

2021 ANNUAL REPORT

Letter from the CEO

Dear reader,

Throughout 2021, Fact Forward continued to keep young people and their families at the forefront of our work. Through this commitment, we have made great strides in adolescent reproductive health and healthcare access. The annual report always allows me the opportunity to pause and reflect on the successes of Fact Forward as well as

look forward to future goals and achievements. I can say many great things about what we did in 2021, but I'm especially proud of our dedication to avoiding complacency.

Although South Carolina's teen birth rate has declined by 73 percent since its peak in 1991, adolescents in SC are at substantial risk for contracting an STI. SC ranked 4th highest for both chlamydia and gonorrhea among all ages with ages 15-24 accounting for 66 percent of chlamydia cases and 48 percent of reported gonorrhea diagnoses. These numbers might feel alarming, but they are exactly why Fact Forward continues to think strategically and thoughtfully about our work

Throughout this report, you'll see just how many people our work has impacted and why we continue to forge ahead in the ever-changing space of reproductive health. I have talked about the work Fact Forward does, but I cannot speak about it without acknowledging the partners, advocates, stakeholders, and supporters that make it all possible. It has been and always will be a collective effort that makes such a difference in keeping young people and their communities healthy.

As we move forward into another year, we endeavor to remember two things. First, all persons deserve the right to make healthy decisions about their bodies and futures. And second, it is a fact that the health and economic well-being of individuals, communities, and the state of South Carolina is better off with access to high-quality, reproductive healthcare. We are committed to advocating for young people and families by supporting education and policies that foster healthy communities. Thank you for your continued support and for making our work possible.

Who We Are

Fact Forward strives to build and maintain an organization where our staff and board share a common passion, commitment, and pride in the work they do. New people bring fresh perspectives, ideas, and solutions. In 2021, we moved that needle forward through new board members and new roles.

Our Mission:

Fact Forward's mission is to improve the health and economic well-being of individuals, communities, the state of South Carolina, and beyond by preventing teen pregnancy and advancing adolescent reproductive health.

2021 Trainings

In 2021, Fact Forward provided 34 trainings and 345 attendees completed 838 CEU hours.

On a scale of 0-to-10, 82% of participants either rated the training a 9 or a 10 indicating that there is a high likelihood that they would recommend the training to a friend or colleague. The Average score was 9.6.

Topics attendees are interested in:

Attendee survey results:

Training was either good or excellent.

Trainer's performance was good or excellent.

Activities were useful in building their skills.

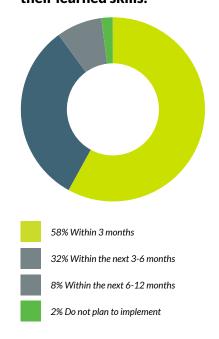

Agreed or strongly agreed that teaching methods were effective.

Thought the content met their expectations.

Agreed, or strongly agreed that the trainer demonstrated expertise, was engaging, well-organized and created a comfortable learning environment.

Agreed or strongly agreed that their knowledge and skills in the course content increased as a result of the training.

Participants plan to implement their learned skills:

How did attendees hear about Fact Forward's training?

(website, email, social)

"The sessions were great, especially the teaching opportunity. I learned a lot from input from others as well."

"Trainers presented and implemented the program effectively and worthwhile."

"The trainers were absolutely amazing. I hope to see them in another training session."

Organizational Goals for Diversity, Equity, **Inclusion, and Belonging (DEIB)**

Following a year of racially motivated events and collective trauma, Fact Forward's leadership identified a need to support staff on their diversity, equity, inclusion, and belonging (DEIB) journeys. Beth Ruffin, from the Everyday Inclusionist[™], facilitated trainings and discussions on anti-racism, allyship, accessibility, LGBTQ+ terminology, and other key DEIB topics.

The goal of our DEIB effort is threefold:

Workplace Inclusion

Fact Forward will foster a culture that encourages collaboration, flexibility, and fairness where all employees feel included, valued, and recognized for their potential and accomplishments.

GOAL 2:

Open Communications

Fact Forward will strengthen its communications to include DEIB-related content in a transparent, authentic way to build trust among all employees. Fact Forward aims to address and heal previous harms and create an environment prohibiting future harm.

GOAL 3:

Sustainability & Accountability

Fact Forward will identify and break down systemic barriers to full inclusion by embedding DEIB in policies and practices, equipping leaders with the ability to manage and be accountable for the results. Fact Forward aspires to be an example and a model for the nonprofit community committed to fostering inclusive environments.

Our DEIB efforts have led to several lessons learned. The most important of these is that each person has a unique perspective and experience with systems of oppression. Everyone has been impacted by these systems and suffers trauma throughout life. It's our responsibility, individually, to listen with an open heart and mind to the stories of others so that we can meet in a commonplace.

DEIB work can be uncomfortable, but it is worth the effort. As we move into another year, our commitment is to create a culture that supports our employees through respectful and meaningful engagement that influences how we show up and do this important work.

South Carolina Teen Birth Trends

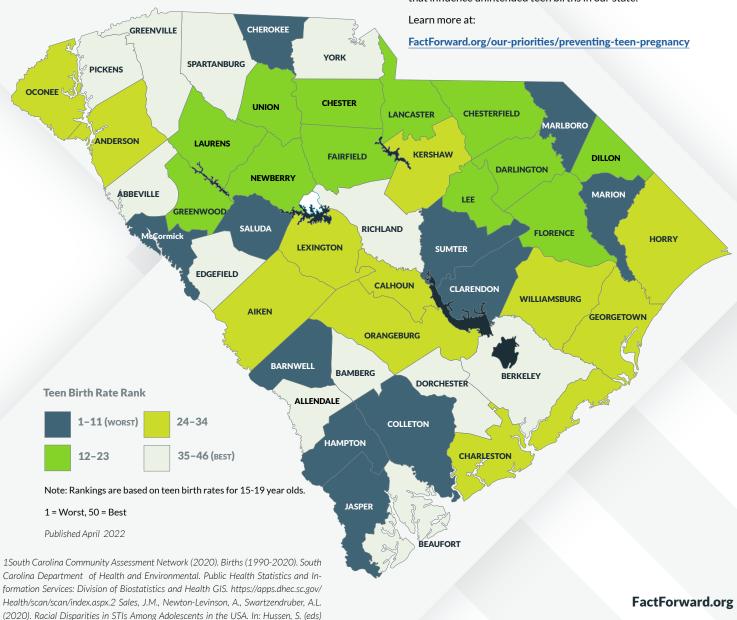

South Carolina's teen birth rate has declined 73% since peaking in 1991, continuing decades of success for communities across the state. Most significantly, the teen birth rate in South Carolina decreased by 11% between 2019 and 2020. This makes the teen birth rate for 15-19 year olds 19.3 per 1,000 females.

From 2019-2020, Hispanic teens (15-19) were the only teen demographic to experience an increase. Black teens experienced a 7% decrease and white teens experienced a 20% decrease. Since 2002, Hispanic teens have had the highest teen birth rates, with rates consistently above the state rate and rates of white and Black teens.

Sexually Transmitted Infections in Adolescence and Young Adulthood. Springer, Cham.

https://doi.org/10.1007/978-3-030-20491-4_3

These disparities are potentially accounted for by structural barriers that create higher rates of poverty and unemployment, and lower education levels among people of color. Poverty and unemployment can lead to an inability to pay for medical care, which limits access to preventative care including contraceptives and education about sexual health with medical providers. Through resources such as this, Fact Forward encourages communities and youth-serving professionals to not only engage in conversation about the ranking of teen births in South Carolina counties, but also address the social determinants of health that influence unintended teen births in our state.

South Carolina Teen STI/STD Rates

Although South Carolina's teen birth rate has declined by 73% since its peak in 1991, adolescents in SC are at substantial risk for contracting an STI/STD. In 2019, the most recent national data, South Carolina ranked 4th highest for both chlamydia and gonorrhea among all ages. Additionally, adolescents (ages 15-24) accounted for 66 percent of chlamydia cases and 48 percent of all reported gonorrhea diagnoses. While all races are impacted by STIs, there are large differences between white teens and Black and Hispanic teens' STI rates. For example, in 2020, Black, Non-Hispanic teenagers aged 15-19 had 2,504 Chlamydia cases per 100,000, compared to White, Non-Hispanic youth who had 627 Chlamydia cases per 100,000. The same pattern is seen with Gonorrhea cases, with Black, Non-Hispanic youth aged 15-19 having a rate of 953 cases per 100,000 compared to White, Non-Hispanic youth having a rate of 155 cases per 100,000. These disparities are potentially accounted for by structural barriers that create higher rates of poverty and unemployment, and lower education levels among people of color. Poverty and unemployment can lead to an inability to pay for medical care, which limits access to preventative care and education about sexual health with medical providers. Fact Forward encourages educators, medical professionals, and parents or trusted adults to use this document to engage their community in conversations surrounding the importance of STI/STD education and prevention.

Chlamydia and Gonorrhea Numbers and Rates by County

Ages 15 - 19
